See the attached graphic for some facts about sun exposure! The easiest way to avoid the problems associated with sun exposure is to wear a hat and cover whatever skin you can AND use a sun screen! But not all sunscreens are created equally! There are some very scary ingredients in certain sunscreens and all of these ingredients absorb into your skin, the largest organ you have! What sunscreen do you normally wear? And what do you like/ not like about it?! COMMENT BELOW FOR A CHANCE TO WIN A FREE TUBE OF SHAKLEE SUNSCREEN!

<http://www.consumerreports.org/.../don-t-spray-suns.../index.htm>

The infographic is divided into three main sections. The top section features a sun icon and a clock showing 10 a.m. and 4 p.m., with arrows indicating UV rays passing through windows. Text reads: "Up to 90% of the visible signs of aging are caused by sun damage." A red circular callout labeled "SKIN FACT" states: "The UV rays you get through your windows can penetrate your skin." The middle section shows five stylized human figures (one red, four blue) with the text: "One in five Americans will develop skin cancer in the course of a lifetime." Below this, it says: "The risk of skin cancer doubles if you've had 5+ sunburns." The bottom section shows a person's back with a hand on their shoulder, with a row of colorful sunscreen bottles at the bottom. Text reads: "26 Seconds. is all it takes for the chemicals in your personal care products to enter your bloodstream. What's in your products?"

Kassia Rosebaugh I use whatever is in our closet, but then again I tend to not wear sunscreen often. I put aveeno kid sunscreen on my kiddos though. I have always known sunscreen isn't really the greatest but I don't want my kids getting burned either! I will definitely be looking into this for the summer!

Our skin is our biggest organ! It is so important we allow it to "do its thing" - breathe, push out impurities, absorb nutrition from the outside, and so much more - which means avoiding mineral oils, petroleum, and other ingredients that create a seal over the skin.

How can we support the skin in this?? Eat a clean diet filled with tons of veggies, drink water to stay hydrated, avoid personal care products that have harmful ingredients, and look for ones that support the sk...

Thinking Bigger ... Reaching Higher

In this Winter 2017 semester, we are preparing ourselves to:

- o And see the possibilities that lie within each of us... including picturing ourselves achieving the ranks of Executive and Key Coordinator.
- o **We will achieve these ranks by becoming an Executive Coordinator on the inside ... even as we assemble and empower the team that will take us there ... on the outside.**

Exciting new perks are coming from the company around these 2 ranks, starting with the automatic qualifying for Top Achievers Trip to CHINA and the Great Wall when we achieve Key Coordinator ..

The Law of the Lid

Leadership Ability Determines a Person's Level of Effectiveness

How well you lead determines
how successful you are.

Your leadership ability is the **lid** on your potential

- Right Hand = Your current leadership level
- Left Hand = Your business, organization, or team

Dedication + Hard Work \neq **Effectiveness as a Leader**

Unlimited Potential

Your Potential
- Lamp: **You**

Your Results

Your **Leadership Lid** is being seen and felt in your results every day.

The Law of Influence

*The True Measure of Leadership is Influence;
Nothing More, Nothing Less*

- Every interaction you have with another person is an attempt to influence them.
- Greater impact requires greater influence.

Leadership is Learnable

- Leadership = Influence
Influence is a result of Adding Value
- Leadership ≠ Position or Title

“Everything rises and falls on leadership.”

Experience & Insight

*“Those who do not learn from history,
are doomed to repeat it.”*

Experience is automatic; insight is not.

If you have been doing it wrong for 10 years, that’s long
enough!”*

Awareness & Intentionality

*“My current level of leadership is the **lid**

Susan Knott – Results of Having a Plan for Personal

Growth

Being intentional about personal growth (understood the value of having a specific plan)

- If you want your life to improve, you must improve yourself
- Accidental Growth vs. Intentional Growth
- If you want to reach your potential and become the person you were created to be, you must do much more than just experience life and hope that you learn what you need along the way. Growth doesn't just happen. You have to go after it.

Law of Awareness --you must know yourself to grow yourself; your strengths & weaknesses, your interests and opportunities

- You cannot win if you do not begin
- It means doing something specific every day that will take you another step closer to your goal.

Confidence increased (action brings confidence)

Feeling of empowerment (i can do this; I'm good at this; I do have the skills needed)

Expanded my thinking-- in all areas of my life, which is transforming.
